

# Cloud --- Connect

## Transform your business in the Cloud

Extend your network perimeter to the cloud with dedicated and private connections to AWS, Google Cloud, Microsoft Azure, Oracle Cloud, and IBM Cloud — using Arelion’s global backbone.

### **Controlled Cloud connectivity**

Using our direct connections to the major cloud providers, we provide you with a secure on-ramp to the cloud. Cloud Connect is a private and dedicated connection that bypasses the public Internet — giving you more control of your bandwidth, with high-levels of security and reliability.

### **Simple pricing**

We offer simple and flexible pricing options to accommodate your changing bandwidth needs. You have the freedom to modify contract terms at short notice and configure your connection to suit your business needs. The service options are easily accessible by using our online portal [MyArelion](#) with simple purchasing options.

### **Reach multiple clouds at scale**

Cloud Connect allows you to use a single port to connect to one or multiple cloud providers — a cost-efficient way to scale cloud connectivity. Your bandwidth needs for cloud usage will always be serviceable as we operate with ample capacity to ensure our global backbone is optimized for highly scalable, burstable workloads.

### Benefits in brief

#### **Control**

Bypassing the public Internet, your traffic traverses our global backbone, providing a more predictable cloud experience.

#### **Simplicity**

Ethernet port options 1<sub>GE</sub>, 10<sub>GE</sub>, 100<sub>GE</sub>

Cloud Connection 50<sub>Mbps</sub> – 10<sub>Gbps</sub>

Our pricing model accommodates your changeable bandwidth needs with 1GE, 10GE and 100GE Ethernet ports available to connect you to Arelion’s backbone and bandwidths from 50Mbps to 10Gbps for the Cloud connection. This depends on Cloud Service Provider’s (CSP) support and offer.

#### **Scalability**

We have ample capacity on our backbone to support bandwidth-intensive workloads.

#### **Security**

As a Tier-1 provider, we have built our Internet backbone with an exceptional level of security. Additionally, we offer different options of redundancy, both for customer sites and cloud service providers.

Did you know?

You can order your Cloud Connect service in less than 1 minute, using our online portal [MyArelion](#)!

# Cloud Connect

## Technical highlights

We have built multiple direct interconnects in several regions to the leading global Cloud Service Providers (CSP). Arelion maintains at least two diverse interconnects to each CSP service region. Customers can configure their connectivity based on the level of redundancy needed. Most customers prefer to use a single port with dual connections to their CSPs, and benefit from our diverse interconnections to provide full redundancy over Arelion's Internet backbone.

Option 1: A single physical port and cloud connection

Option 2: A single physical port and dual cloud connections provide full redundancy from Arelion's backbone onward

Option 3: Dual physical ports and dual cloud connections provide full redundancy from customer's network onward

## Use cases

**Boost innovation with cloud**  
Cloud Connect provides the ideal environment to experiment and test cutting-edge technologies available in the cloud. Organizations can significantly improve their innovation pipeline with a reliable connection.

**Migration to cloud native infrastructure**  
Cloud Connect is ideal for organizations looking for a secure and reliable migration environment, while they transition towards a cloud-native infrastructure.

**Simplify multiple cloud connectivity**  
Cloud Connect provides organizations with a simplified, flexible, and secure connection to multiple cloud providers, enabling better opportunities to scale and control cloud usage in a multi-cloud environment.
